What is claimed is:

- 1. A foamed polyolefin resin sheet comprising a foamed polyolefin resin layer and a non-foamed surface layer formed of a thermoplastic resin composition having an A1/A2 ratio falling within a range between 1 x 10<sup>-8</sup> and 1 x 10<sup>-1</sup>, wherein A1 is a maximum absorbance of the infrared absorption spectrum of the thermoplastic resin composition within an infrared ray wave number region of from 1700 to 1750 cm<sup>-1</sup> and A2 is a maximum absorbance of the infrared absorption spectrum of the thermoplastic resin composition within an infrared ray wave number region of from 1455 to 1465 cm<sup>-1</sup>.
- 2. The foamed polyolefin resin sheet according to claim 1, wherein the thermoplastic resin composition comprises 100 parts by weight of a polyolefin resin and 0.1 to 100 parts by weight of a carboxylic acid-modified polyolefin resin.
- 3. The foamed polyolefin resin sheet according to claim 1, further comprising a non-foamed layer formed of a long-chain branched polyolefin resin between the foamed layer and the non-foamed surface layer.
- The foamed polyolefin resin sheet according to claim
  wherein the carboxylic acid-modified polyolefin resin is
  a maleic anhydride graft-modified polyolefin.
